***Allowable Subject Matter***

1. Claims 1-19, 21-22, 24-29, 33-50, 52 and 54-57 allowed.
2. The following is an examiner's statement of reasons for allowance: The present invention is directed to a manhole depth monitoring apparatus. Each independent claim identifies the uniquely distinct features "a processor connected to the transceiver and configured to periodically transmit the depth measurements to a remote monitoring station, wherein the processor is programmable through remote instructions received from the remote monitoring station and wherein said processor is configured to operate according to plurality of alertness modes distinguished by sampling rate or depth measurements or rate of transmitting to the remote station" in combination with the manner claimed. The closest priors arts, Matsumura et al. [US 5,111,201], Otto et al. [US 6,539,794], Marsh et al. [US 5,811,688] and Hunter et al. [US 5,608,171] wherein Hunter teaches a similarly invention, however, does not specific teaching that a plurality modes includes a rate of transmitting to the remote station. Therefore, either singularly or in combination, fail to anticipate or render the above distinct limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
